

GTAA Security Policy

At the Greater Toronto Airports Authority (GTAA), health, safety and security are our top priorities. As the airport operator, the GTAA is committed to and has the overall responsibility for the management, coordination, integration and implementation of the airport's security program and initiatives.

We need to strive every day to maintain an effective, comprehensive, and integrated approach to airport security by:

- Shaping a proactive culture of security vigilance and awareness where all employees feel accountable for their own security and that of the entire airport;
- Obligating all employees to identify, report and address security concern and recognizing those who demonstrate a strong security culture;
- Minimizing negative operational impacts and providing positive passenger experiences; and
- Working collectively with our security partners to improve the airport security posture.

The [GTAA Non-Punitive Reporting Policy](#) is in place to encourage those who have concerns to report them without fear of reprisal¹.

It is the responsibility of each individual tenant, sponsor, agency and/or organization that provides services at Toronto Pearson to ensure that their employees are fully trained and aware of all applicable security laws, regulations, programs, and procedures. It is also the responsibility of every Toronto Pearson employee to know the extent of their restricted area pass access and each employee is expected to faithfully carry out their duties and obligations including, but not limited to, obeying the laws, policies, procedures, programs and all rules and regulations set forth by GTAA and all applicable local, provincial, and federal regulatory agencies.
