

Noise Management Forums

Public Meeting

Welcome + Introductions

Pearson Public Meetings

Pearson Public Meetings are part of the Noise Management Forums.

- The meetings provide residents with:
 - A chance to learn more about airport operations and how your area is impacted
 - Hear updates from GTAA and NAV CANADA about noise management
 - Ask questions or raise concerns related to airport operations
- The Public Meetings are recorded and posted online at <u>www.torontopearson.com/nmf</u>

Agenda

- About Toronto Pearson
- Noise Management Roles + Responsibilities
- Pearson LIFT Update
- Operations + Community Impacts
- Question Period

Noise Management Roles + Responsibilities

The **Greater Toronto Airports Authority** (GTAA) is a not-for-profit private business that manages and operates the airport according to the Ground Lease with the Federal government with a mandate to meet the capacity demands. The GTAA develops and manages a Noise Management Program also required under the Ground Lease.

NAV CANADA is the air navigation provider in Canada, responsible for safe and efficient movement of aircraft. NAV CANADA designs and publishes a network of air routes to design criteria set by Transport Canada and ICAO. It also assigns runways at Toronto Pearson.

Airlines are responsible for conducting operations in accordance with the Transport Canada regulations and the airport's Noise Abatement Procedures and Noise Operating Restrictions.

Transport Canada is the regulator for aviation in Canada. It ensures Canadian aircraft are compliant with the international noise standards through the aircraft certification process, establishes flight path design criteria and land-use guidelines based on noise exposure. It approves proposed changes to and enforces the Noise Abatement Procedures and Noise Operating Restrictions. Transport Canada also audits the airport's Night Flight Restriction Program annually.

Community members engage with Toronto Pearson regarding the airport's operational impacts. This may include attending public meetings, community open houses, registering aircraft noise complaints. Toronto Pearson values input and feedback that helps us to be a better neighbour.

Pearson by the Numbers

46.8 M
Passengers served in 2024

199Destinations

53 Airline partners

14Major air cargo operators

1,910 People Directly employed by GTAA (Toronto Pearson)

4,600Acres

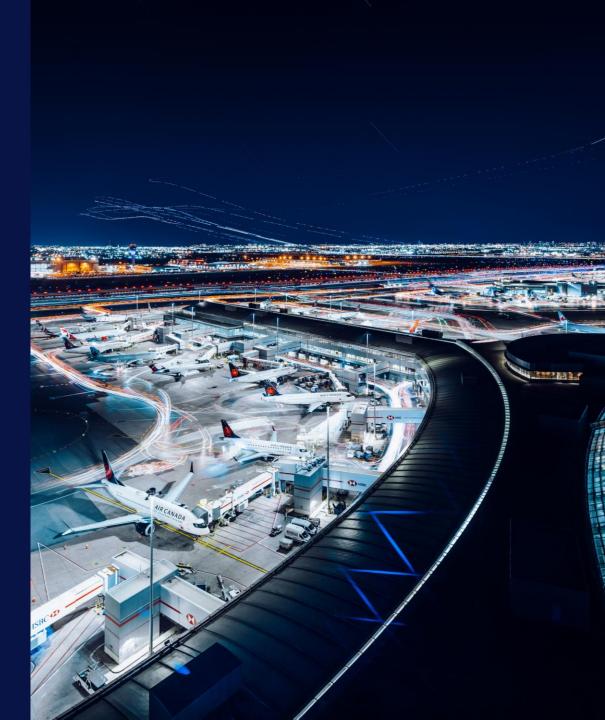

Occupied by business operations (about 12,500 hockey arenas)

Generated for Canada

Non-stop, year-round

Pearson LIFT

Multi-project programs spanning the next decade

MAJOR PROGRAMS

Accelerator

Upgrades and improvements to critical operational assets; interim facilities to accommodate near-term passenger growth.

T1/T3 Revitalization

Renovations to both terminals to optimize capacity and renew assets.

Gateway

New terminal facilities to accommodate longer-term passenger growth and deliver an exceptional passenger experience.

SUPPORTING PROGRAMS

Digitalization & Innovation

Digital initiatives focused on modernization, transformation, and building future-ready systems and facilities.

Baggage Handling System

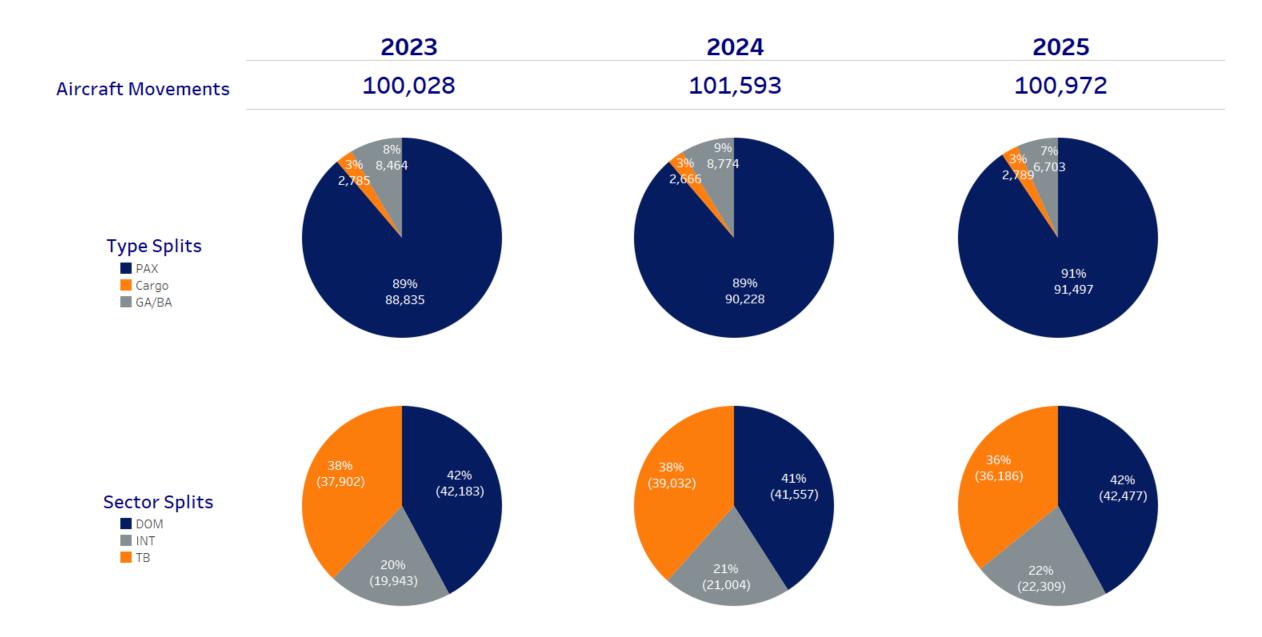

Baggage systems and solutions to address both immediate operational requirements and long-term needs.

Pearson LIFT status update at-a-glance

What's Next **Current Status >>>>> Design Validation** Advancing detailed design **ACCELERATOR** work in phases Preparing to launch competitive T1/T3 Launch competitive procurement process for Construction REVITALIZATION procurement process Manager and Designer Preparing to launch competitive Launch competitive **GATEWAY** procurement process for Progressive procurement process Design Builders

Operations - Q3

The Runways

Toronto Pearson has five runways

Two north-south runways:

Runway 15L/33R

Runway 15R/33L

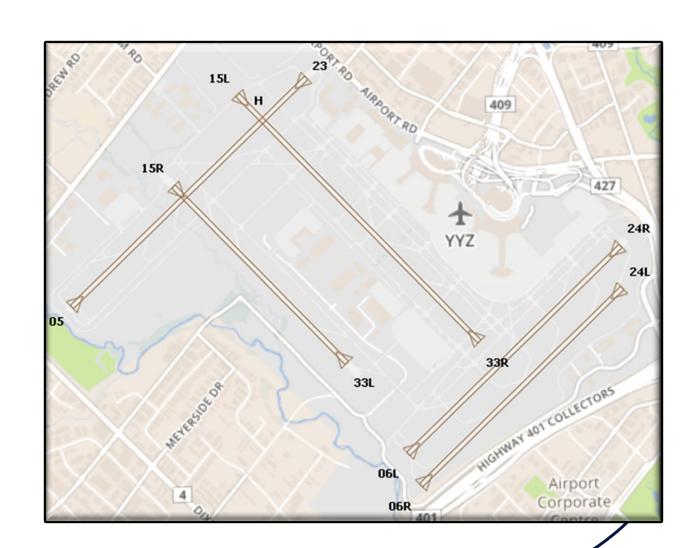

Three east-west

Runway 05/23

Runway 06L/24R

Runway 06R/24L

Runways can be used from both ends, so while there are five runways, there are 10 operational ends for arrivals and departures

Runway Selection

Air Traffic Controllers consider many factors when selecting a runway configuration:

Wind - direction, windspeed, crosswinds

Runway and Taxiway Availability - can be affected by maintenance, snow clearing and other factors

Surface conditions - (wet, dry, ice, snow) combined with wind conditions

Distance to Runway – the primary departure runway is typically the shortest distance from the terminal – less fuel consumption, less GHG

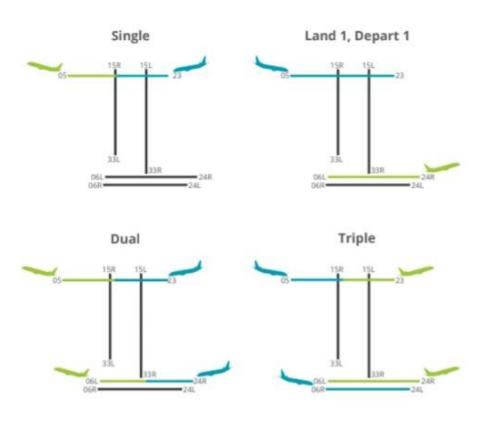

Traffic Demand & Capacity – traffic levels vary seasonally and even throughout the day. Runway configurations are selected for optimal capacity

Time of Day – the Nighttime Preferential Runway System is used between midnight and 6:30 am. It is designed to affect the fewest people in the nighttime hours

Runway Length – sometimes a longer runway is needed for long haul, large/heavy aircraft

Traffic Distribution Q3 and Q2 2025

- North/South runways were used for 4% of aircraft movements in Q3 2025 down from 6% in Q2 2025
- Hours with Triple operations are up in Q3 2025 vs Q2 2025

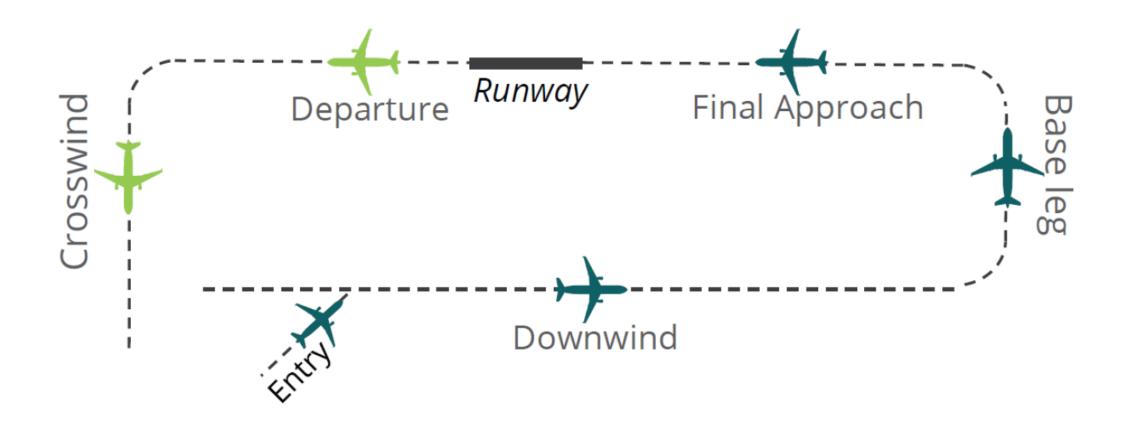

Configuration Usage (hours):

	Q2 2025		Q3 2025		vs. Q2 '25	
	Hours	%	Hours	%	Hours	
Single	261	12%	83	5%	-178	
L1D1	211	4%	39	2%	-172	
L1D1 w/Offloads	1387	68%	1367	69%	-20	
Dual	108	7%	147	8%	39	
Triple	18	2%	275	14%	257	
Multi-Direction	175	9%	25	2%	-150	

Runway Usage (movements):

	Q2 :	2025		Q3 2025			
	ARR	DEP	%	ARR	DEP	%	
05	5,794	16,787	23%	5,774	15,192	21%	
06L	2,153	5,461	23%	1,762	4,501	20%	
06R	14,992	26		14,015	284		
23	3,777	21,667	26%	5,877	24,355	30%	
24L	19,124	33	23%	21,077	40	25%	
24R	2,313	1,941		2,385	2,202		
33L	1,622	959	5%	665	456	3%	
33R	139	2,310		67	1,742		
15L	27	202	1%	54	307	1%	
15R	444	1		234	0		
Total	50,385	49,387		51,910	49,079		
Grand Total	99,	772		100,989
